

## Summary

The November 2025 monthly report includes return to owner (RTO) rates for found animals, average length of stay (LOS), and live-release-rates.

These are key industry measures for the effectiveness of shelter operations to reunite or find placements for animals. There are also numbers of volunteer hours, and donation fund revenue, expenses, and balances.

## Animal Intake

MCAS accepted stray dogs, sick, injured or at-risk adult cats and kittens from the public. Officers also picked up stray or lost animals. Owner-surrendered animals were accepted on a case by case basis, depending on urgent circumstances; *adoption returns are also included in the total*. Other intakes represent animals placed into emergency custody by Animal Services officers, injured wildlife, or shelter offspring.

### Animal Intake by Type and Circumstance

## Veterinary Care Provided

Animal Health and Animal Care staff provided a wide range of veterinary services to animals in care.

To keep animals healthy, Animal Health staff administered vaccinations, including rabies, [DA2PP](#) and Bordetella for dogs and puppies, and [FVRCP](#) for cats and kittens.

They provided health exams and consultations, including routine exams, wound checks, pre-surgery checkups, behavior assessments, and reviewing test results or diagnoses with foster volunteers. *Due to veterinary staff availability, spay and neuter surgeries for shelter animals were limited.*

*Some pre-adoption spay & neuter surgeries were completed at Oregon Humane Society (OHS) and Feral Cat Coalition of Oregon (FCCO).*

## Fostered Animals

The majority of animals in foster care were kittens, dogs, cats, and puppies. Many animals entered and left foster care over the course of the month, so the total number represents the cumulative total, and not the maximum number of animals in care at one time. **Thank you to 145 foster volunteers for your lifesaving service.**

305 or 49.7% of animals were adopted.

127 or 20.7% of animals were reclaimed by their owners. *The majority of animals represented in these outcomes were dogs with a license and/or microchip for owner-contact.*

119 or 19.4% of animals were transferred to another agency.

61 or 9.9% of animals were humanely euthanized, including cases of injured wildlife, injured or severely sick cats and kittens, and other domestic animals for medical reasons, or for behavioral issues which would make an animal unsafe to place back into the community. [Cat intake is officially limited to cases where the cat is sick or injured, or in immediate danger due to cruelty, neglect,](#)

## Volunteers

Volunteer contributions are essential to our daily operations and the well-being of our community's animals. These efforts span a wide range of activities, from direct animal care to crucial operational support. A vital network of foster volunteers provides specialized, in-home care for our most vulnerable animals, including neonatal kittens, puppies, and those with medical or behavioral needs. At the shelter, volunteers ensure that animals receive daily exercise and socialization, facilitate adoption "meet and greets," and maintain clean, enriched living environments. Furthermore, they provide indispensable support for foundational needs, such as laundry and dishwashing, and offer assistance to administrative staff and during special events.

**Thank you to our volunteers for your service to the pets and people of our community!**
